

ZERO WASTE PICNIC AT MOOLGYAN FARM

THINK CARE ACT

60 FOR SUSTAINIBILITY

"Now I will always try to carry my own water bottle and avoid using plastic. I will also share what I learned with my family and friends so they can follow it too. It was a fun learning experience, and it made me feel more connected to nature and our home culture."
Peeyush - Grade 8

"We reminded each other not to use plastic and to keep the place clean. Some of us also helped others in separating waste properly. Everyone worked as a team, and it felt nice to take responsibility."
Alok - Grade 8

Recycle - Sort waste correctly and recycle materials like paper and plastic.

"During the picnic, we made sure to keep things separate, and it felt like we were doing something good together."
Anshu - Grade 8

Reduce - Buy only what you need and avoid overconsumption.

When we plucked salad and ate food from the farm, I understood how much effort it takes to grow food. So I did not waste anything. I also learned that food waste can be turned into compost, which is useful again.
Shweta - Grade 6

Reuse - Use reusable bags, containers, and bottles. Repair items instead of replacing them.
